

John Diedenhofen
Founder, Deeds Enterprises LLC
President, AFCEA Las Vegas

John Diedenhofen founded Deeds Enterprises LLC as a U.S. Small Business Administration (SBA) certified service-disabled veteran-owned small business (SDVOSB) to protect our critical infrastructure sectors (e.g., Communications, Water, Energy, etc.) from cyber threat actors.

John also currently serves as the President of the Armed Forces Communications and Electronics Association (AFCEA) Las Vegas Chapter.

Previously, John served as the President of QTEC Solutions, Inc., leading the organization through the acquisition by Source Intelligence and subsequent yearlong transition as they integrated into their new parent company.

Originally joining QTEC Solutions as the Vice President of Sales and Marketing, John owned responsibility for worldwide sales of QTEC Solutions data and software as a service (SaaS) solutions. Prior to that, John held business development roles of increasing responsibility, most notably for Lockheed Martin engaging on the U.S. Navy's Mobile User Objective System (MUOS) next generation ultra high frequency (UHF) satellite communications (SATCOM) program.

Retired from the U.S. Marines, John deployed worldwide and led engineering projects as an Engineer Officer, and supported the U.S. Strategic Command as a Space Operations Staff Officer – one of the U.S. Marine Corps' very few "space cadre." John is a veteran of Operation Restore Hope and Operation Enduring Freedom, and counts the Defense Meritorious Service Medal and Joint Service Commendation Medal among his awards and decorations.

John holds a Bachelor of Science degree in psychology from Texas A&M University, a Master of Arts degree in business from Webster University, and a Master of Science Business Administration degree in production and operations management from San Diego State University.
